KERAS CALLBACKS

<https://keras.io/callbacks/>

- Logging
- Early stopping
- Checkpoints
- Remote monitor
- Tensorboard
- ...

OPEN CV

open source computer vision + ML library

- detect and demarcate faces
- identify objects
- classify human actions in videos
- track camera movements
- track moving objects
- extract 3D models of object
- produce 3D point clouds from stereo cameras
- stitch images
- find similar images from an image database
- remove red eyes from images
- follow eye movements
- recognize scenery
- establish markers to overlay it with augmented reality
